The 7th International Conference on Exploring Service Science, IESS 1.6, will be organized by University Politehnica of Bucharest, Romania, on May 25-27, 2016, and it will be hosted in the Conference Centre of the University. The Conference will bring together academic and practitioners from service industry and their worldwide partners in a collegial and stimulating environment. According to its tradition, IESS 1.6 will cover major areas of R&D and education related to Service Science and service innovation, including new research trends such as: society development due to services, environment contribution to the co-exploration and co-creation of multi-disciplinary, multi-institutional and multi-national services, the role of services in the integration of the new possibilities powered by IT, development of generic models for the process of service construction.

Paper submission and proceedings

Authors are kindly asked to submit original, not published or being considered elsewhere full papers in Springer LNBIP format via Easy Chair conference management system: <https://easychair.org/conferences/?conf=iess16>. The working language is English. Papers should not exceed 5,000 words, recommended length is 10 to 14 pages. The participants will receive a copy of the proceedings. All accepted and presented papers** will be published in the Springer Series "Lecture Notes in Business Information Processing", abstracted/indexed in CPCI (ISI) Proceedings, SCOPUS, DBLP, EI, Google Scholar and Springerlink.

Conference Topics

Papers are solicited on topics related to one or several topics of the following list, but not limited to. Contributions should be grounded in one or several contexts, and be open to multi-disciplinary approaches.

- Service exploration processes
- Business transformation through Service Science
- New service business models
- Modelling of the service consumer needs
- Modelling of business services requirements
- Service information & process modelling
- Service design methodologies and patterns
- Service co-design environments, tools
- Requirements oriented towards services
- IT-based service engineering
- Modelling and design of IT-enabled service systems
- Service delivery systems
- Product-service systems
- Service innovation and strategy
- Sustainability in services
- Governance of service systems
- Service System networks
- Education for service innovation
